

RESOLUTION NO. 2004-08

**RESOLUTION REGARDING COLLECTION OF
DELINQUENT GARBAGE ACCOUNTS, FEES,
AND LIST OF DELINQUENTS**

WHEREAS, the Rush Township Board of Supervisors has established yearly collection fees and a collection policy, regarding the collection of garbage fees and/or accounts; and

WHEREAS, the Rush Township tax collector has been collecting garbage fees and receiving a 3% collected commission from the township for same; and

WHEREAS, all delinquent garbage accounts up to and including 2003 have been and are currently turned over by the tax collector to Rush Township for collection by the township; and

WHEREAS, Rush Township has been and is presently incurring added collection expenses in attempts to collect any and all delinquent garbage fees and/or accounts.

NOW, THEREFORE, BE IT RESOLVED, that at the June 15, 2004 Supervisors' meeting a motion was made, seconded and carried that Rush Township will retain all monies collected by the Township at the present time and heretofore, on delinquent garbage accounts and Township will not be required to forward a collection fee of any type to the Rush Township Tax Collector on said delinquent accounts.

BE IT RESOLVED that the tax collector will be required to forward a list of delinquent garbage accounts to the Rush Township Board of Supervisors on or before March 1st of each year, containing the parcel number, name, address and amount of all prior year delinquent accounts.

BE IT RESOLVED that upon receiving payment of any and all delinquent account or accounts, Township will forward the tax collector the name or names and amount of payments received by Township to update tax collector's list.

TABLE R301.2(1)
CLIMATIC AND GEOGRAPHIC DESIGN CRITERIA

GROUND SNOW LOAD	WIND SPEED ^e (mph)	SEISMIC DESIGN CATEGORY ^g	SUBJECT TO DAMAGE FROM				WINTER DESIGN TEMP ^f	ICE SHIELD UNDER-LAYMENT REQUIRED ⁱ	FLOOD HAZARDS ^h	AIR FREEZING INDEX ^j	MEAN ANNUAL TEMP ^k
			Weathering ^a	Frost line depth ^b	Termite ^c	Decay ^d					
40	90	B	Severe	36			7	yes		1000	1000

For SI: 1 pound per square foot = 0.0479 kN/m², 1 mile per hour = 1.609 km/h.

- a. Weathering may require a higher strength concrete or grade of masonry than necessary to satisfy the structural requirements of this code. The weathering column shall be filled in with the weathering index (i.e., "negligible," "moderate" or "severe") for concrete as determined from the Weathering Probability Map [Figure R301.2(3)]. The grade of masonry units shall be determined from ASTM C 34, C 55, C 62, C 73, C 90, C 129, C 145, C 216 or C 652.
- b. The frost line depth may require deeper footings than indicated in Figure R403.1(1). The jurisdiction shall fill in the frost line depth column with the minimum depth of footing below finish grade.
- c. The jurisdiction shall fill in this part of the table with "very heavy," "moderate to heavy," "slight to moderate," or "none to slight" in accordance with Figure R301.2(6) depending on whether there has been a history of local damage.
- d. The jurisdiction shall fill in this part of the table with "moderate to severe," "slight to moderate," or "none to slight" in accordance with Figure R301.2(7) depending on whether there has been a history of local damage.
- e. The jurisdiction shall fill in this part of the table with the wind speed from the basic wind speed map [Figure R301.2(4)]. Wind exposure category shall be determined on a site-specific basis in accordance with Section R301.2.1.4.
- f. The outdoor design dry-bulb temperature shall be selected from the columns of 97¹/₂-percent values for winter from Appendix D of the *International Plumbing Code*. Deviations from the Appendix D temperatures shall be permitted to reflect local climates or local weather experience as determined by the building official.
- g. The jurisdiction shall fill in this part of the table with the Seismic Design Category determined from Section R301.2.2.1.
- h. The jurisdiction shall fill in this part of the table with (a) the date of the jurisdiction's entry into the National Flood Insurance Program (date of adoption of the first code or ordinance for management of flood hazard areas), (b) the date(s) of the currently effective FIRM and FBFM, or other flood hazard map adopted by the community, as may be amended.
- i. In accordance with Sections R905.2.7.1, R905.4.3, R905.5.3, R905.6.3, R905.7.3 and R905.8.3, for areas where the average daily temperature in January is 25°F (-4°C) or less, or where there has been a history of local damage from the effects of ice damming, the jurisdiction shall fill in this part of the table with "YES." Otherwise, the jurisdiction shall fill in this part of the table with "NO."
- j. The jurisdiction shall fill in this part of the table with the 100-year return period air freezing index (BF-days) from Figure R403.3(2) or from the 100-year (99%) value on the National Climatic Data Center data table "Air Freezing Index- USA Method (Base 32° Fahrenheit)" at www.ncdc.noaa.gov/fpsf.html. The jurisdiction shall fill in this part of the table with the mean annual temperature from the National Climatic Data Center data table "Air Freezing Index- USA Method (Base 32° Fahrenheit)" at www.ncdc.noaa.gov/fpsf.html.

Termite Moderate to Heavy
Decay Slight to Moderate

FLOOD HAZARDS - UNDER FLOOD MAP
